

SistemCTM

Architettura | Città | Quarz

SistemC ridisegna e rinnova la collezione di tinte unite arricchendola con numerosi nuovi colori: superfici opache e lucide che si integrano nel Marazzi Colour Plan facilitando l'abbinamento con le altre collezioni Marazzi Tecnica.

SistemC redesigns and renews the plain colours collection, introducing several new colours: matt and shiny surfaces which integrate the Marazzi Colour Plan, making them easier to combine with the other Marazzi Tecnica collections.

SistemC redessine et renouvelle la collection de teintes unies en l'enrichissant avec une vaste gamme de nouvelles couleurs : des surfaces mates et brillantes qui s'intègrent dans le Marazzi Colour Plan pour faciliter l'association avec les autres collections Marazzi Tecnica.

SistemC legt die Kollektion der Unifarben neu auf und bereichert sie mit vielen neuen Farben: glänzende und matte Oberflächen, die den Marazzi Colour Plan vervollständigen und die Zusammenstellung mit anderen Kollektionen von Marazzi Tecnica erleichtern.

SistemC rediseña y renueva la colección de colores lisos enriqueciéndola con numerosos nuevos colores: superficies mates y brillantes que se integran en el Marazzi Colour Plan, facilitando la combinación con las demás colecciones de Marazzi Tecnica.

SistemC изменяет дизайн и обновляет коллекцию однотонного материала, обогащая ее многочисленными новыми оттенками: матовые и блестящие поверхности интегрируются в Marazzi Colour Plan, что облегчает сочетаемость с другими коллекциями Marazzi Tecnica.

Bright and neutral shades, decorative pieces, sizes and surfaces, which all work together to tile both public and residential settings in a colourful way.

Des teintes neutres et vives, des propositions décoratives, des formats et des surfaces qui se combinent pour revêtir les espaces de couleur, dans le domaine public comme dans le secteur.

Neutrale und lebendige Farben, dekorative Vorschläge, Formate und Oberflächen, die zueinander passen, um öffentliche Bereiche und Wohnräume mit Farbe zu gestalten.

Tinte neutre e vivaci, proposte decorative, formati e superfici, che si combinano per rivestire con il colore spazi pubblici e residenziali.

Colores neutros y vivos, propuestas decorativas, formatos y acabados, que se combinan para revestir con el color espacios públicos y residenciales.

Нейтральные и яркие оттенки, декоративные решения, форматы и поверхности, комбинируемые между собой, облицовывают цветом общественные и жилые помещения.

- *** **Consigliato per la posa a rivestimento di interni, si suggerisce la posa con colle poliuretaniche ed epossidiche. In caso di utilizzo di colle cementizie, si raccomanda l'accortezza di pulire immediatamente l'eccesso di colla sulla parte in vista con acqua ed una spugna morbida. È sconsigliato l'uso del listello/tozzetto in zone salmastre a forte concentrazione di atmosfere saline perché soggetto a formazione di ruggine. Consigliamo anche di non utilizzare i listelli in condizioni di immersione continuativa.**

Recommended for interior coverings, laid using polyurethane and epoxy adhesives. If using cement-based adhesives, clean off the excess glue immediately from the visible areas with a soft sponge. Listel tiles and inserts should not be used in brackish areas with a strong concentration of saline atmospheres, because they are subject to rust formation. We also recommend avoiding the use of the listel tiles in conditions where they are continually immersed in water.

Conseillé pour une pose en intérieur, il est préconisé d'employer des colles polyuréthaniques et époxy. En cas d'utilisation d'adhésifs à base de ciment, il est recommandé de bien nettoyer tout de suite l'excès de colle sur la partie en vue avec une éponge douce imbibée d'eau. L'utilisation du listel/ cabochon est déconseillée dans les endroits saumâtres à forte concentration d'atmosphères salines car il est sujet à la formation de rouille. En outre, nous conseillons de ne pas utiliser les listels dans des endroits immergés en permanence.

Für die Verkleidung von Innenbereichen und bei Verwendung von Polyurethan- und Epoxyd-Klebern empfohlen. Im Falle einer Verwendung von Zementklebern empfehlen wir, den überstehenden Kleber auf den sichtbaren Bereichen sofort mit Wasser und einem weichen Schwamm zu entfernen. Die Verwendung der Leiste/des Einlegers in Brackwassergebieten mit einer hohen Salzkonzentration in der Luft ist nicht empfehlenswert weil sich Rost bilden kann. Wir empfehlen die Leisten auch nicht in Bereichen zu verwenden, die ständig unter Wasser liegen.

Está aconsejado para la colocación de revestimientos de interiores, recomendándose la colocación con adhesivos de poliuretano y epoxi. En caso de utilización de cemento-cola, se recomienda limpiar inmediatamente el exceso de adhesivo de la parte visible utilizando agua y una esponja blanda. Se desaconseja el uso del listelo/taco decorativo en zonas salobres con una fuerte concentración de atmósferas salinas, al estar sujeto a la formación de corrosión por picaduras. Se aconseja también no utilizar los listelos en condiciones de inmersión continua.

Рекомендуется для облицовки стен в помещениях; укладка выполняется на полиуретановый изпоксидный клей. В случае применения клея на цементной основе следует немедленно удалить его избытки с видимых участков с помощью мягкой смоченной в воде губкой. Не рекомендуется применение бордюра/уголка в солесодержащих средах с большой концентрацией соли в атмосфере, поскольку он подвержен образованию ржавчины. Также рекомендуем не использовать бордюры/ступени в условиях постоянного погружения в воду.
